To Whom It May Concern

I have been associated with Scientific and Technical Recruitment Limited since early 1999, initially as Technical Manager for Fernz Health and Science and more recently as Technical Manager for Healtheries of New Zealand. I have utilised their recruitment service to provide a wide variety of technical staff including Chemists, Documentation Officers, Quality Control Analysts, Laboratory Technicians and Food Technologists.

I have been very happy with this association with Scientific and Technical Recruitment. The company has made every effort to understand my requirements and to provide me with candidates who have met technical and organisational needs at that time. They have provided their service in a cost-effective and timely manner and their Consultants have been professional, knowledgeable and helpful during the entire recruitment process. In addition, the company follows strict guidelines of ethical and moral behaviour and I have found them to be honest in all our business dealings.

I would have no hesitation in recommending Scientific and Technical Recruitment Limited and am happy to be contacted by telephone if any further information is required.

Richard Keene
Technical Manager
